

Mid Valley Pipeline Spill Update for 10/26/2014

- There are 402 personnel working the response. EPA has 2 personnel, 3 contractors, a boat and a mobile command post on scene.
- 3112 bbl. of crude oil has been recovered
- 2647 bbl. of the recovered crude oil has been transported off-site and recycled at Sunoco's Haynesville Station, in Haynesville, LA. Recovered oil totals have been adjusted to accurately reflect the totals from the field.
- Water and oily mix collected to date is 2484 bbl. with 870 bbl. shipped offsite. 1105 cubic yards of soil, debris and sorbent have been collected, none of which has been shipped off-site at this point.
- Wildlife rehabilitation efforts continue. So far, 37 animals have been cleaned, 23 animals released and 460 animals have been found dead, of those 2/3 were fish or reptiles.
- No impacts to Caddo Lake have been observed
- The contingency plan to establish steps to be taken if oil impacts Caddo Lake was finalized and signed by Unified Command.
- The spill location has been sampled and backfilled with erosion controls put in place.
- The new section of the pipe has been installed and tested. A rectified amount of oil spilled will be available early in the week as the pipeline is placed back in service.
- Media interest remains low.
- The semi-permanent large-scale underflow dam construction was completed at 1800 on the 26th.
- The flushing of the creek in Division B continued on the 26th. Zone 1 of Division C may have flushing begin in the next few days.
